

# INDESIGN BASICS

**ESSENTIALS: DAY 22**

# DO NOW:

Decide on your favorite layout to practice with today. How many columns and/or rows were in the grid?

# OBJECTIVES:

You will learn the basics of InDesign to create a yearbook spread by using the Selection Tool, Rectangle Tool, Rectangle Frame Tool, Swatches, and Align.

You will recreate your layout using design principles and proper use of grid, bleeds, links, margins, and gutters.

# BEFORE YOU

# START (you only need to do this once)

**Setup Your Preferences:**

(with no documents open)

Change your units to inches if you like,

**MAKE SURE SPELL CHECK IS ON**

Object>Fitting>Frame Fitting Options

Change to "Fill Frame Proportionally"

# BEFORE YOU START

## **FILE ORGANIZATION:**

Photos for each spread must be downloaded in their own folders.

PHOTOS CANNOT BE MOVED AROUND  
ONCE YOU START WORKING!

Your InDesign file must be stored in the same folder as its photos.

FOLDER NAME and SPREAD NAME:  
002\_003\_PAGE TOPIC\_YOUR NAME

# EYELINE

Horizon line that carries your eye across both pages

## **TIPS**

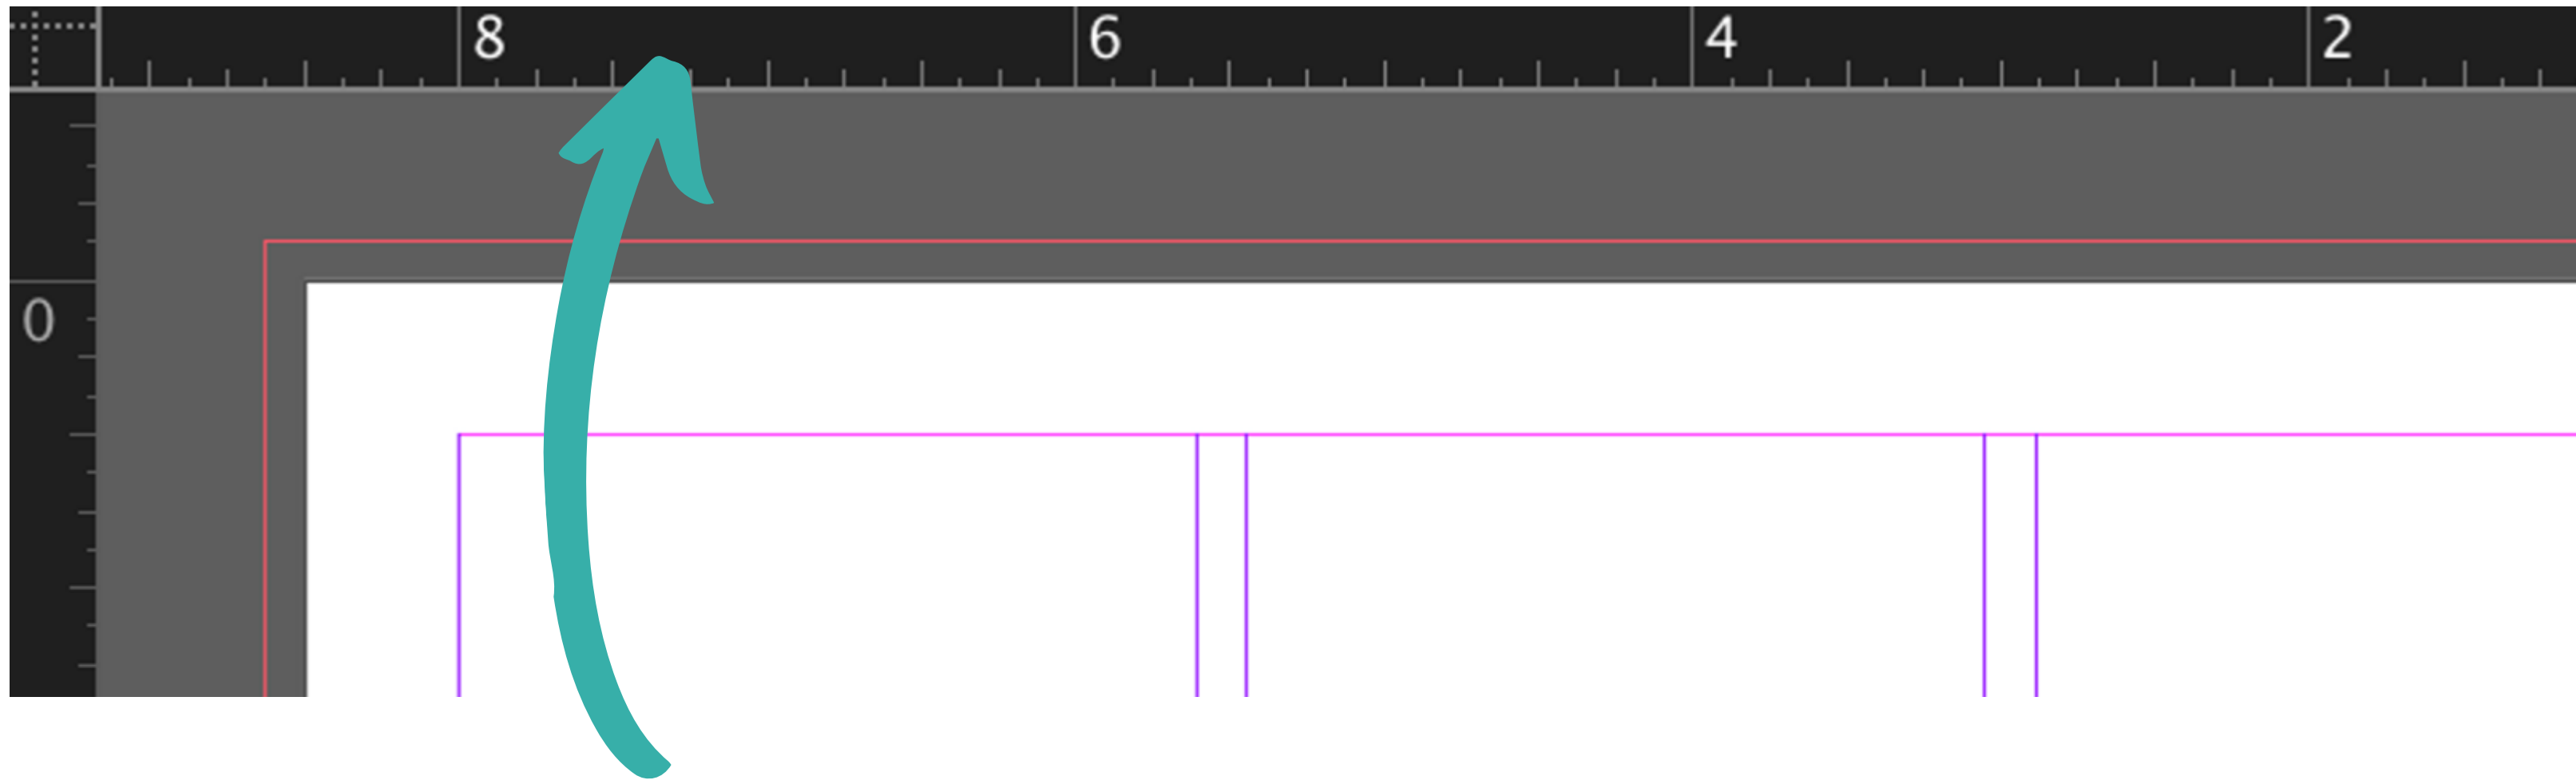

**DRAW IT FIRST!**

do not divide the spread exactly in half

can be broken once

# rulers/guides

**make sure your rulers are visible - if not: view > show rulers**

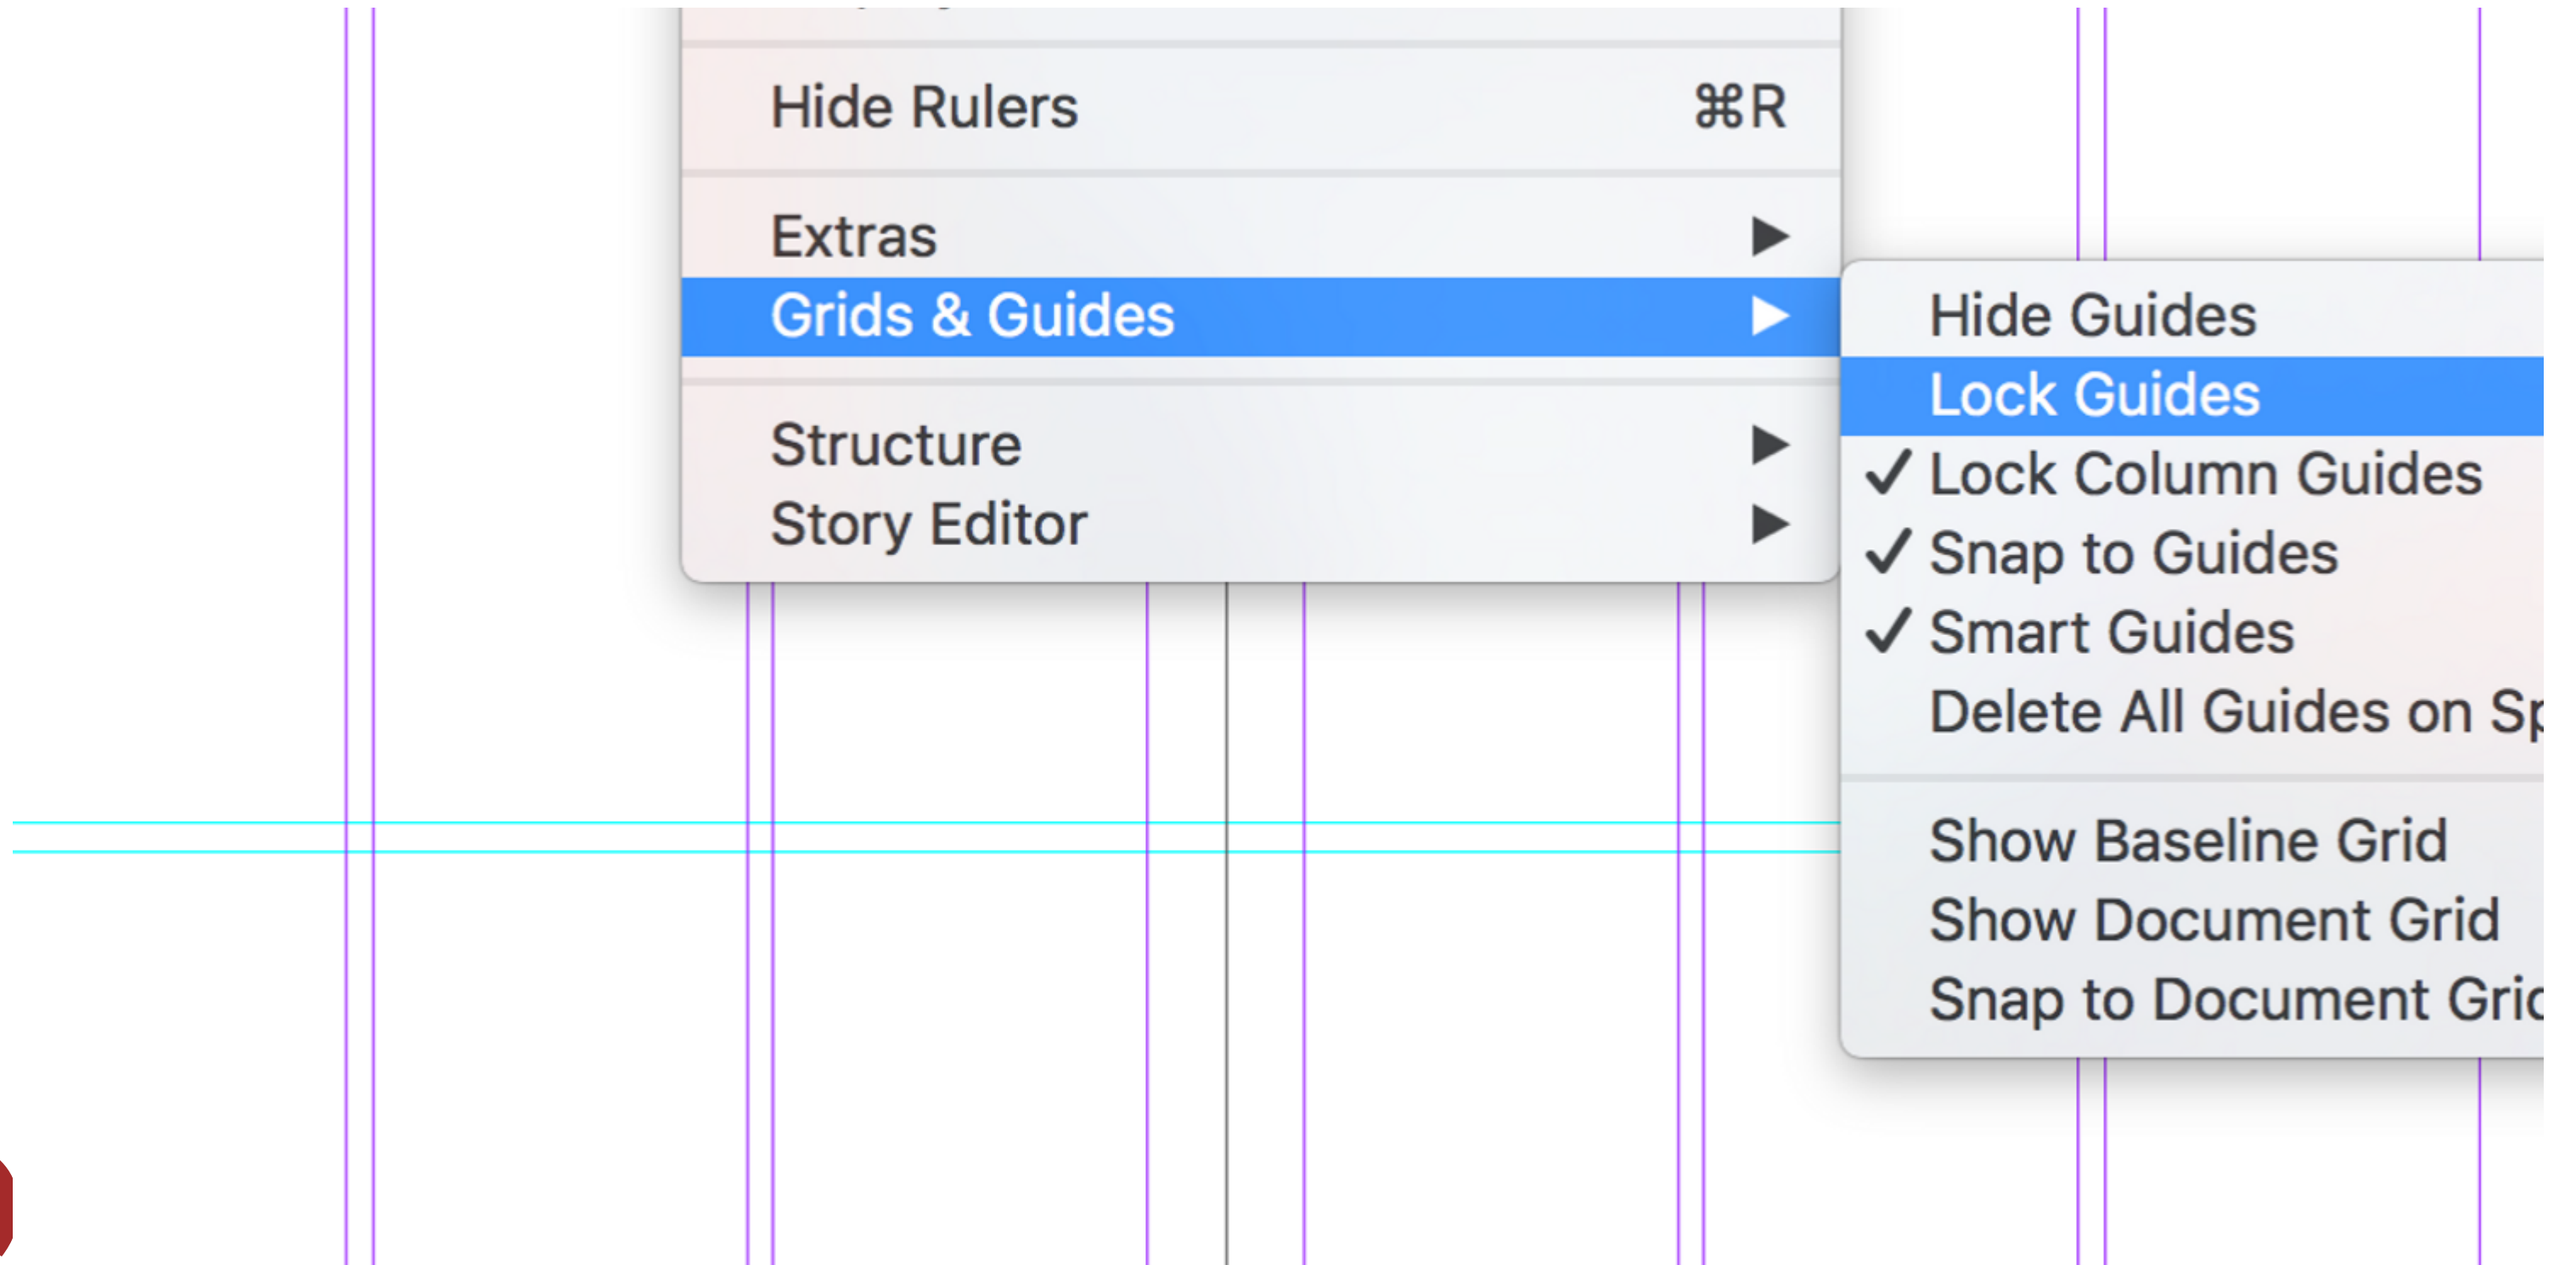

## **ADD YOUR EYELINE GUIDES**

Drag a horizontal guide down from the ruler and place it where you want your eyeline to be. Do this on both sides of the spread. Make sure they align. Add another line one pica below for spacing. (if you are using rows, skip this step!)

# eyeline

## VIEW MENU

**LOCK YOUR GUIDES AFTER YOUR EYELINE IS IN PLACE**

# FIND THE **FRAME TOOL**

**DRAW A BOX! MOVE IT AROUND WITH THE SELECTION TOOL**

**RESIZE FROM THE CONER POINTS**

**RECREATE YOUR LAYOUT  
USING FRAMES! RESIZE  
USING THE SELECTION TOOL.  
MAKE SURE YOUR INTERNAL  
SPACING IS EQUAL.  
ALLOW WHITE SPACE.**

**DIVIDE EACH SPREAD INTO A LAYOUT  
USING A VARIETY OF GRIDS:**

**ALL SKETCHES MUST INCLUDE:**

**Dominant photo (2-3X bigger than any box)**

**Headlines with story**

**Secondary Coverage Mod**

**Caption Box**

**Additional photos of varying size/shape**

**Eyeline (start with this, then do dom. photo)**

**White space near the outside**

# FRAMES

When you place an image, you automatically get a frame with it. The image is placed into the frame.

This might be what it looks like.

But the rest of the image still exists, it just can't be seen because it's been cropped by the box.

This is what's actually happening

Faded image=cropped by the frame.

## Some Basic Gram- mar Rules

Using ampersands within  
body copy is incorrect &  
should be avoided.

The same goes for  
double spaces used after  
punctuation. Got it?

## Some Basic Grammar Rules

Using the word 'and' is a  
correct and easy substitute  
for an ampersand.

Furthermore, one space  
after punctuation is more  
than enough. Got it?

**orphan is removed by bringing the preceding word down a line**

**widow is gotten rid of by adjusting column length**

# LINKS

Ian Pasetky

Your images are not IN your inDesign document, they are linked to it.

**DO NOT COPY AND PASTE IMAGES INTO INDESIGN OR MOVE FILE LOCATIONS**

**Translation:** Keep all the images you are using for your files in one place (folder). If you move the image, then indesign won't be able to find it and **it will print low resolution (like this) --->**
